Annexure

This table shows the crop activity status on specific dates, based on satellite-derived vegetation indices (NDVI, EVI, RVI) and land cover data. Each row represents a timepoint where the model predicts whether the land was actively cropped or left fallow/inactive.

| Predictions Over Timestamps on the Parcel |            |       |       |       |       |                  |
